JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact support@jstor.org.

in any case, in the opinion of the attending physician, such removal would be unsafe to the patient, and such opinion is confirmed by the judgment of a physician of the board of health, the patient may remain in quarantine in his home.

Rule 87. Every house wherein there has been found to be any person suffering from smallpox, scarlet fever, or diphtheria shall be strictly quarantined in the case of smallpox until 14 days; in the case of the others until immediately after disinfection of the house by the health officer, when either the patient has died and been buried, removed to the hospital, or recovered.

Rule 88. When it becomes necessary to establish quarantine for scarlet fever or diphtheria in any building where the arrangement of the rooms and the facilities for caring for the patient are such that the patient and the nurse can be isolated from the rest of the house, the health officer may permit the adult members of the household to follow their daily occupations, provided such occupation does not bring them in close contact with children. No person enjoying the privileges granted in this rule shall enter the room of the patient, and any violation shall be sufficient reason for quarantining the entire household and be punished by the penalty hereinafter prescribed. When a case of scarlet fever or diphtheria develops in a house from which other children attend school, the children who show no evidence of the disease may be removed to another house, but shall not attend school until 10 days shall have elapsed from the date of their removal, nor shall any other children in the house to which they were removed attend school for the same period.

Rule 89. When any house infected by the presence of a person suffering from any disease enumerated in rule 82 shall no longer contain a patient so suffering it shall be the duty of the attending physician to so report to the board of health, when the infected house shall be thoroughly disinfected by the health officer.

Rule 90. It shall be the duty of the managers of public libraries to have all books known to have been in infected houses thoroughly disinfected before being again placed in circulation.

Rule 91. No person having tuberculosis shall serve as principal or teacher in any public or private school in this city or admitted as a pupil therein.—(Regulations, board of health, adopted Jan. 22, 1910.)

VACCINATION.

Rule 92. No person shall attend or be permitted to attend any school in the city of Altoona, either as teacher or pupil, unless either he shall have had the smallpox or have been successfully vaccinated. It shall be the duty of each teacher or superintendent or other person or persons having charge of such school before admitting any person to attendance to receive a certificate from a registered physician on a blank furnished by the board of health setting forth that such person has been vaccinated with successful result. Indorsement after personal examination in each case by the physician of the board of health shall be required on the school board's docket opposite the name of the party vaccinated in order to validate the vaccination and permit attendance at school.

Rule 93. Where any person desiring to attend school in the city of Altoona appears to any registered physician to be immune after a second attempt at successful vaccination has been made by him, then such person shall be vaccinated by or in the presence of the physician of the board of health. If this attempt shall also fail, then the physician of the board, acting in his official capacity, shall authorize the admission of such person to the school for one year only.

Rule 94. It shall be the duty of the superintendent of the public schools and the person or persons in charge of any other schools to keep a register of pupils and teachers admitted to the schools on vaccination certificates with blank space after such name for a validation indorsement, as required in rule 92. It shall not be required of a pupil once properly and lawfully enrolled on this register to present a second certificate of vaccination.—(Regulations, board of health, adopted Jan. 22, 1910.)

PENALTY FOR VIOLATING REGULATIONS OF BOARD OF HEALTH.

Rule 95. Any person guilty of violating any of these rules or regulations, or who shall neglect or refuse to comply with the provisions and duties therein set forth, upon conviction before the mayor or any alderman of the city of Altoona, shall for each such violation be liable to a fine of not less than \$5 nor more than \$20, or in default of payment of such fine he shall undergo an imprisonment in the county jail for a period not exceeding 20 days. But in cases where by act of assembly other penalties are prescribed such penalty shall be construed to be in lieu of the penalty laid down in this rule. (Regulations, board of health, adopted Jan. 22, 1910.)
